

# Municipal Performance Grant Scheme

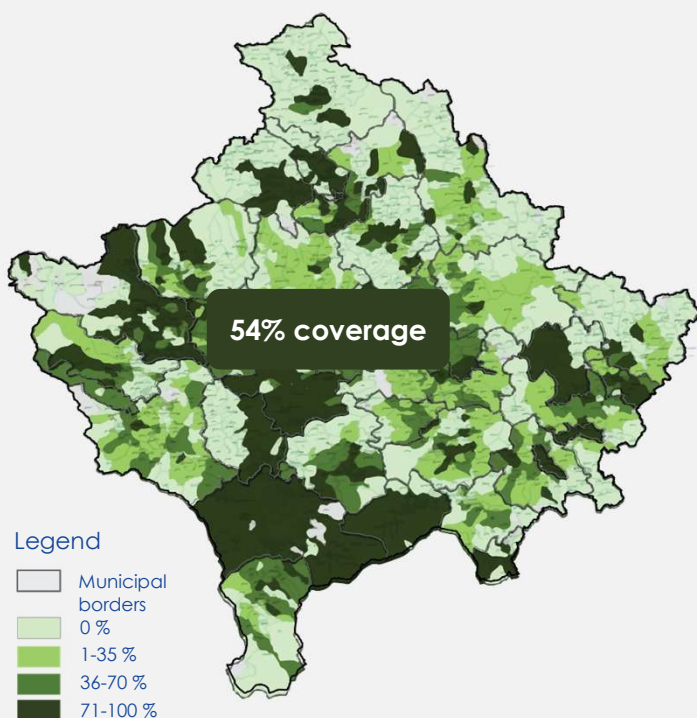

- ▶ The Scheme contributes to implementation of:
  - ▶ **EU Acquis Chapter 27** – Environment and Climate Change  
preventive action, polluter pays principle, shared responsibility
  - ▶ **NPISSA 2022-2026** - Chapter 27 encompassed
  - ▶ **Green Agenda** for WB – Action Plan  
Circular Economy Pillar:
    - 32. Progress in construction and maintenance of WM infrastructure for cities and regions.
    - 33. Design & implement awareness raising on waste prevention, separate collection & sustainable consumption.
- ▶ Could Serve as a Prelude to **Sustainable Environmental Fund** created by Kosovo Government

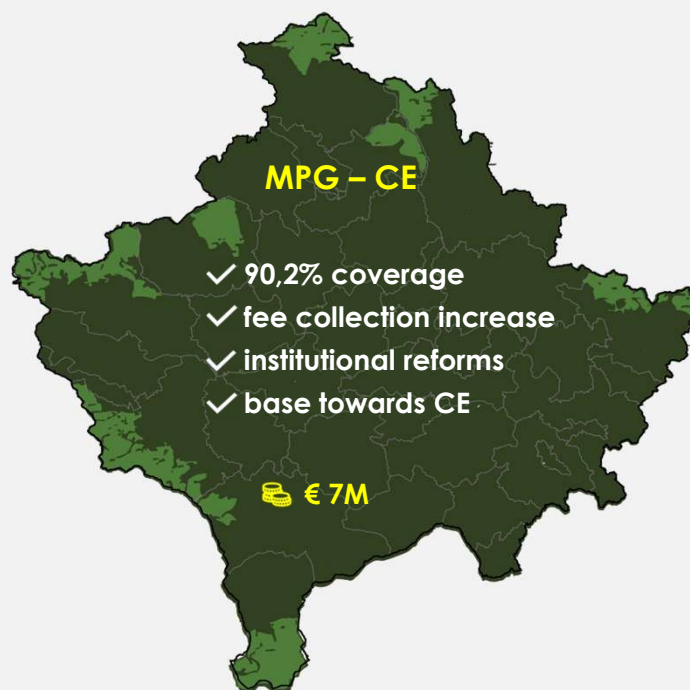

## Waste Management in Kosovo – Progress and Way Forward

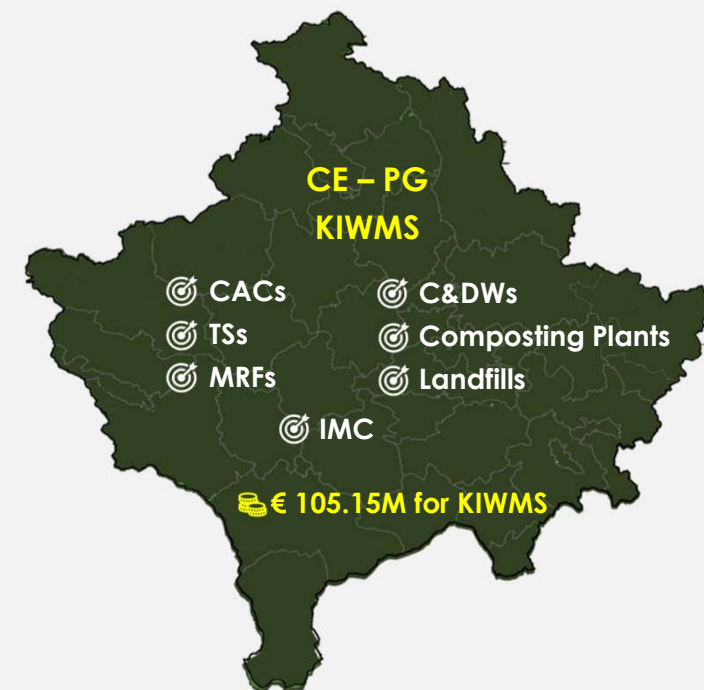

2016

2021

2024 - 2030

## Municipal Performance Grant – Clean Environment (MPG – CE) Design and Implementation

Owned by **Kosovo Government**  
Led by **MESPI**

Target: all **38 municipalities** of Kosovo  
Awarded: 24 out of 38

Implemented  
**2020-2022** (3yrs)

Kosovo Government, EU and German Government  
**Invested € 7 Million**

Municipal performance **incentivized**  
Service provision **improved**

Access criteria and indicators in line with  
**KIWMS & EU accession requirements**

## Achievements in the Sector

**Increase** in waste  
coverage rate  
70.9% in 2017  
**90.2% in 2021**

**Sustainable elimination**  
of illegal landfills  
2246 in 2017  
**763 in 2022**

**Increase** in fee  
collection rate  
80.64 % in 2017  
**81.80 % in 2021**

Over **70,000 new**  
**households**  
added to the  
system

**35 municipalities report**  
annually to **KEPA**  
Only 3 reported in 2017

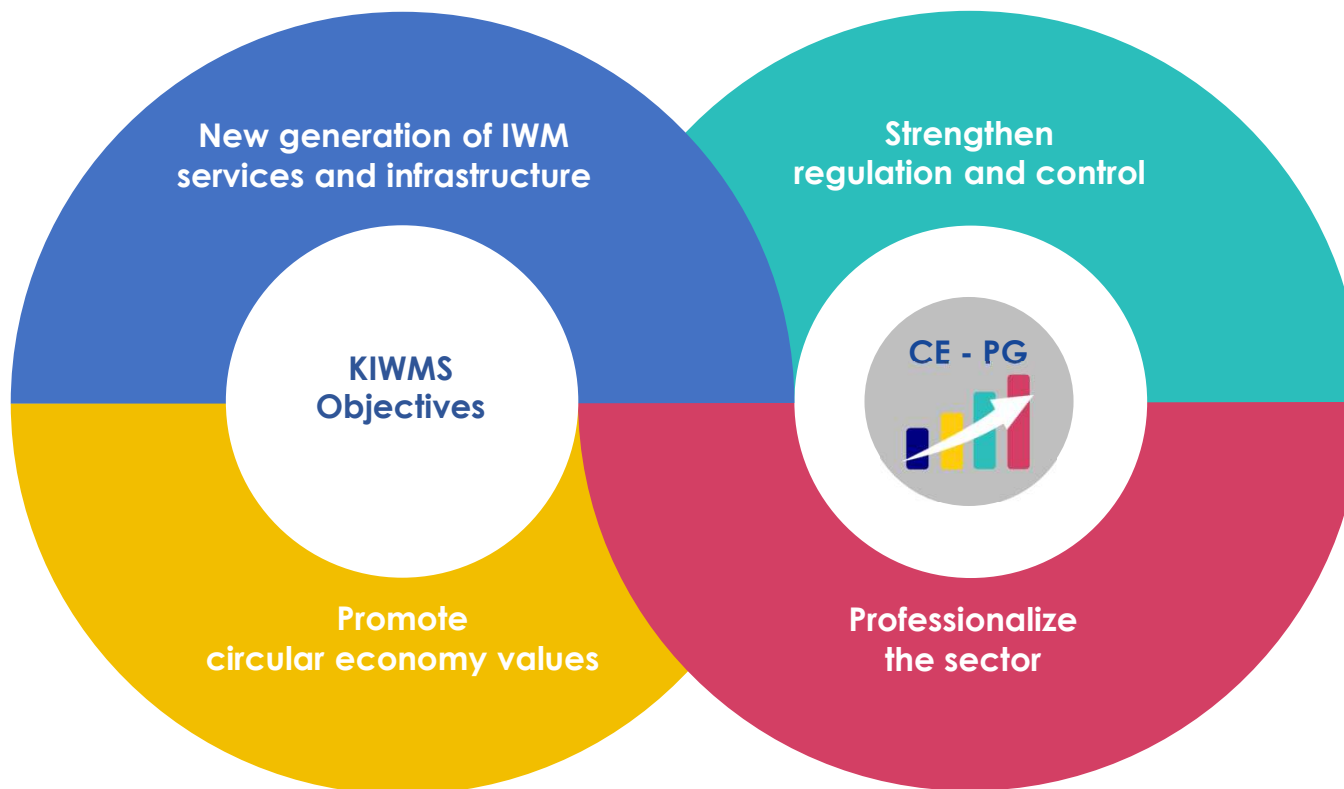

**30,162 households in**  
17 municipalities have  
access to **separate**  
**collection services**

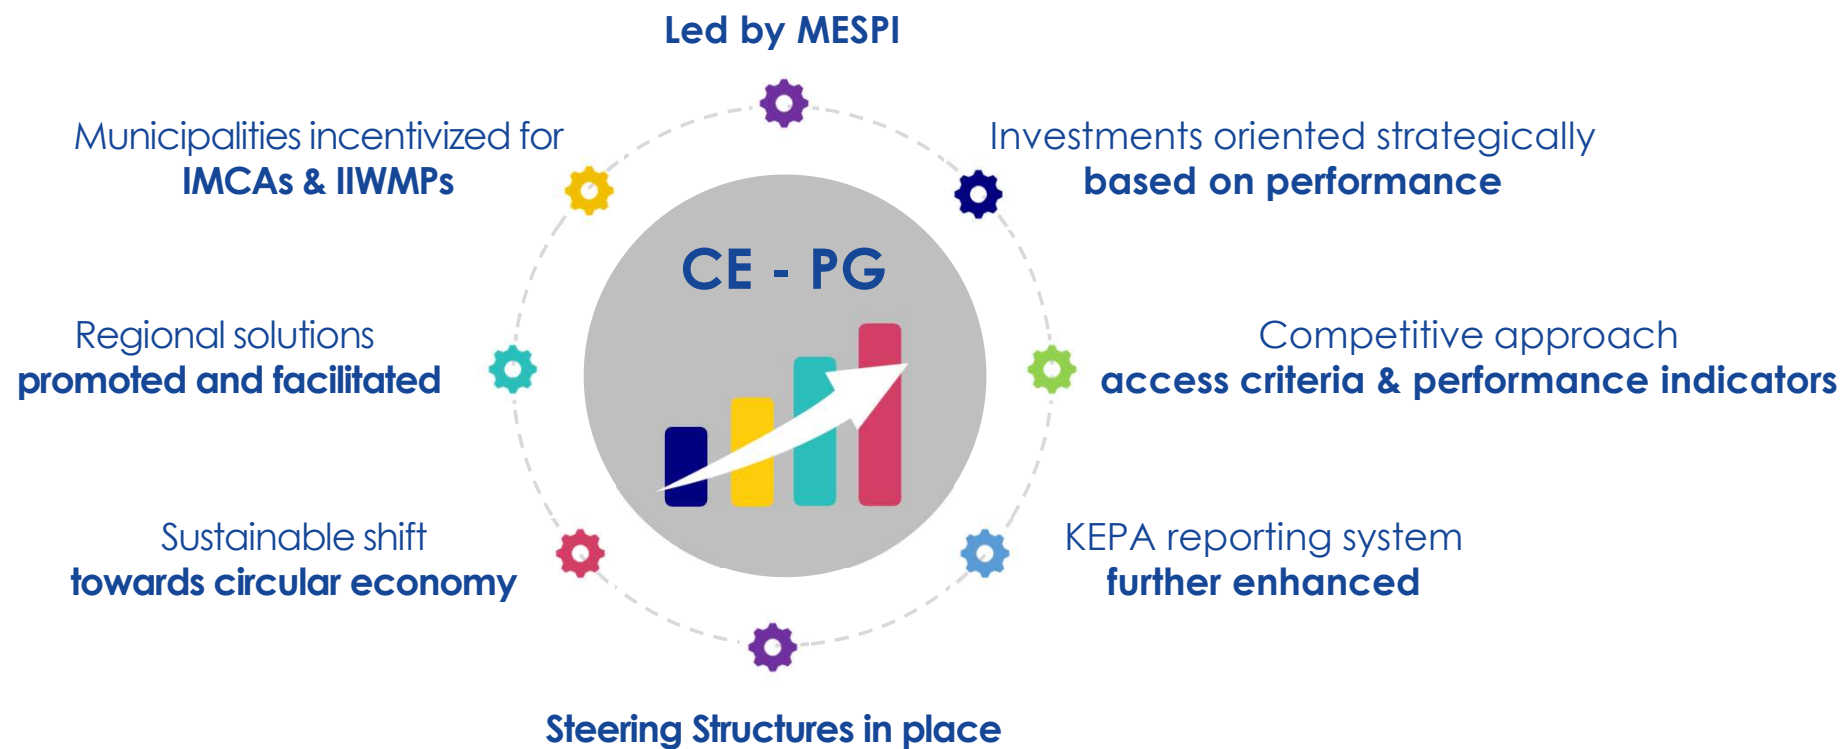

## MPG – CE Investments

## Circular Economy – Performance Grant / Environmental Fund A Mechanism for KIWMS Implementation

## Access Criteria and Performance Indicators

### Access Criteria

Bound to **IMC**

To be discussed, designed  
and agreed jointly with  
stakeholders

### Indicators

start from basic services  
progress yearly towards circular economy

### Compliance

#### Legal and Institutional

*i.e. harmonization of legal  
framework with EU Acquis*

### Basic Services

#### Continuation of Service Provision

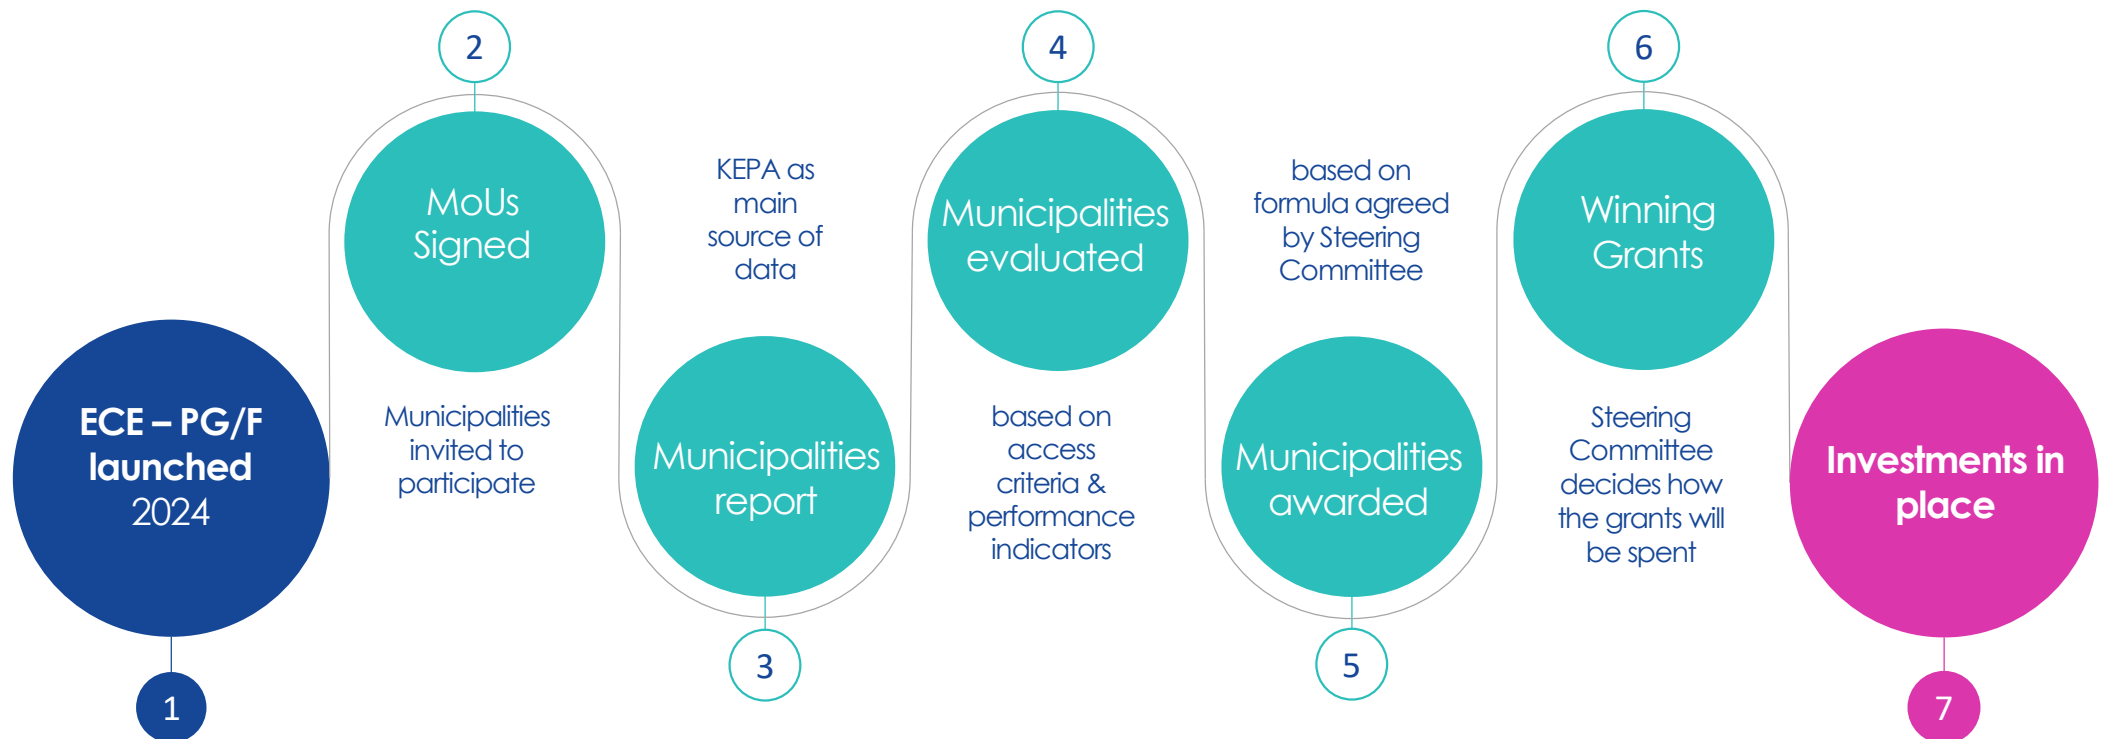

*i.e. ensure sustainability in service  
provision through collection, cost  
efficiency, 0 illegal dumpsites  
policy, etc.*

### Circular Economy

#### Integrated Waste Management

*i.e. separate collection  
capacities, separate systems for  
specific waste fractions, etc.*

## Implementation Process

Steering Committee – main decision-making body throughout the process

## Funding Requirements / Potential Stakeholders

Implementation period  
**2024 – 2027**

Funds required  
**€ 20 M**

Out of € 105.15 M  
for KIWMS implementation

### Potential funding sources:

-  **MESPI – owner of the scheme**
-  EU
-  German Government
-  Other donors
-  Other line ministries (MRD, MLGA, MoE, MoA)
-  Co-financing by Municipalities

## CE – PG Procurement Process

Municipalities  
receive funds  
separately  
through SWMP

Municipalities jointly  
invest towards  
IMC / IIWMP  
implementation

MESPI allocates  
funds & procures  
on behalf of  
municipalities

### Advantage

Municipalities decide  
themselves

### Disadvantage

Does not contribute  
to IMC

### Advantage

Larger investments contribute  
to IIWMP implementation

### Disadvantage

Less incentivisation of certain  
municipalities to perform,  
especially smaller ones

### Advantage

MESPI has the Action Plan for  
KIWMS implementation

### Disadvantage

Procurement procedures  
might be an overload to MESPI  
capacities

## Outcomes to be Achieved – Expected Results

### MESPI

- 🎯 infrastructure-oriented implementation of KIWMS
- 🎯 accurate data to base informed decisions
- 🎯 waste sent to landfills reduced
- 🎯 progression towards CE
- 🎯 IWM further prioritized in political agenda

### Municipalities

- 🎯 sustainability in investments and capacity development
- 🎯 increased efficiency in SWM
- 🎯 commitment quality service provision
- 🎯 motivated to bring sector forward
- 🎯 strategical solutions for regions

### Collective

- 🎯 reduced environmental damage
- 🎯 improved image / increased wellbeing
- 🎯 awareness on circularity (SaS, 3Rs)
- 🎯 economies of scale potential
- 🎯 private sector potential
- 🎯 involvement of relevant stakeholders

Thank You
